School Management Software

## What is School Management Software(School ERP)?

School Management Software is a paperless office automation solution for today's modern schools. The School Management Software provides the facility to carry out all day to day activities of the school, making them fast, easy, efficient and accurate. This software is a simple yet powerful one point integrated platform that connects all the departments of an institution namely office administration, time table, examination, certification, reports generation, result generation, fee counter, library, canteen, pay roll, inventory and many more. The School ERP system helps educators to manage, analyze and get reports of extensive data, while saving time by eliminating repeated data entry.

## Why Iolite - School Management Software?

A school is an organization in which a large amount of different information i.e. student details, staff details, results, student history, certifications, library, notices etc are stored.
